LIGHTNING PICK CLOUD

Lightning Pick Cloud-Hosted System

Lightning Pick on the Azure Cloud

Based on over 30 years of experience developing computerized order fulfillment systems, Matthews has implemented over 1000 instances of Lightning Pick software in all types of companies, primarily for major brands in the distribution, logistics and warehousing industries, as well as manufacturers.

Lighting Pick Cloud has been designed to help more organizations take advantage of the reliability and security of Microsoft Azure Cloud servers. This best-in-class offering expands our long-term commitment to our new and existing customers, user group and partner community by giving a Software as a Service (SaaS) option, including all maintenance and upgrades in a single Lightning Pick Cloud package.

Benefits

▶ Data is available in real-time
▶ Efficient data handling
▶ Security and reliability
▶ Ease of implementation
▶ Less IT involvement

LIGHTNING PICK®

Cloud

Lightning Pick Cloud System

Set Up and Installation

As the leader in the light-directed order fulfillment market, we have worked with many different types of companies, but one challenge affects all of them – the installation of a new automation solution requires a lot of internal IT resources. Perhaps one of the biggest benefits of Cloud is that there is less technical knowledge required from our customers and their IT departments. The Cloud solution greatly reduces your dependence and delays connected to IT.

Implementation in the Cloud is a quick server setup with fast deployment of Lightning Pick software by Lightning Pick engineers. Minimal involvement by the customer's IT department is needed to set up the network. Total installation time depends on hardware requirements. Users will experience Lightning Pick Cloud using a dedicated, site-to-site VPN.

Scalability and Real-Time Data

With Lightning Pick Cloud, the system and data are hosted on a dedicated, private server at an Microsoft Azure data center. It is simple to scale up or down based on business changes – and additional server resources can easily be added at any time. A major advantage of Lightning Pick Cloud is real-time data (with backups for data recovery) – every computer that runs the Lighting Pick GUI is accessing real-time data instantly.

New Releases, Upgrades, and Maintenance

Matthews Automation maintains the environment and upgrades the solution as new upgrades become available. The costs and effort associated with

Microsoft Partner | Silver Application Development
Silver DevOps
Silver Application Integration

upgrades and new releases are lower than the traditional model. Again, the demands on your customer's IT department are greatly reduced.

Maintenance Contract - includes 24×7 product phone support, operational support, and guidance for trained employees on the proper use of the system.

About Matthews

Matthews Automation Solutions' best-of-breed product for light-directed technologies, Lightning Pick, is the number one installed pick-to-light system in North America. Our pick-to-light, put-to-light, pack-to-light, pick carts and other solutions optimize material handling processes — from manufacturing through order fulfillment.

Let's talk about your application.
